For the purpose of this subsection, every person licensed to practice pharmacy and who shall accept the privilege to practice pharmacy in this state by so practicing or by the making and filing of a renewal application to practice pharmacy in this state shall be deemed to have consented to submit to a mental or physical examination or a drug screen, or any combination thereof, when directed in writing by the board and further to have waived all objections to the admissibility of the testimony, drug screen or examination report of the person conducting such examination or drug screen, or both, at any proceeding or hearing before the board on the ground that such testimony or examination or drug screen report constitutes a privileged communication. In any proceeding by the board pursuant to the provisions of this subsection, the record of such board proceedings involving the mental and physical examination or drug screen, or any combination thereof, shall not be used in any other administrative or judicial proceeding.

(c) The board may temporarily suspend or temporarily limit the license of any licensee in accordance with the emergency adjudicative proceedings under the Kansas administrative procedure act if the board determines that there is cause to believe that grounds exist for disciplinary action under subsection (a) against the licensee and that the licensee's continuation in practice would constitute an imminent danger to the public health and safety.

(d) The board may suspend, revoke, place in a probationary status or deny an application or renewal of any retail dealer's permit issued by the board when information in possession of the board discloses that such operations for which the permit was or may be issued are not being conducted according to law or the rules and regulations of the board. - (1) Has obtained, renewed or attempted to obtain or renew a registration by false or fraudulent means, including misrepresentation of a material fact or falsification of any application;
- (2) has been convicted of a felony under any federal or state law relating to the manufacture, compounding, dispensing or distribution of drugs or devices;

65-1631. Licensure required of pharmacists; qualification of applicants; application for licensure by examination; reciprocal licensure; fees; applicants from schools outside the United States.

(a) It shall be unlawful for any individual to practice as a pharmacist in this state unless such individual is licensed by the board as a pharmacist. Except as otherwise provided in subsection (d), every applicant for licensure as a pharmacist shall be at least 18 years of age, shall be a graduate of a school or college of pharmacy or department of a university recognized and approved by the board, shall file proof satisfactory to the board, substantiated by proper affidavits, of a minimum of one year of pharmaceutical experience, acceptable to the board, under the supervision of a preceptor and shall pass an examination approved by the board. Pharmaceutical experience as required in this section shall be under the supervision of a preceptor and shall be predominantly related to the dispensing of prescription medication, compounding prescriptions, preparing pharmaceutical preparations and keeping records and making reports required under state and federal statutes. A school or college of pharmacy or department of a university recognized and approved by the board under this subsection shall have a standard of education not below that of the university of Kansas school of pharmacy. The board shall adopt rules and regulations establishing the criteria that a school or college of pharmacy or department of a university shall satisfy in meeting the standard of education established under this subsection.

(b) All applications for licensure by examination shall be made on a form to be prescribed and furnished by the board. Each application for a new license by examination shall be accompanied by a license fee fixed by the board as provided in K.S.A. [65-1645](#), and amendments thereto.

(c) The board is authorized to adopt rules and regulations relating to the score that an applicant must receive in order to pass the examinations required for licensure. The board shall only accept a passing score on an examination required for licensure from an applicant's first five attempts taking such examination.

(d) Notwithstanding the preceding provisions of this section, the board may in its discretion license as a pharmacist, without examination, any individual who is duly registered or licensed by examination in some other state, except that the board may require that such individual take the multi-state jurisprudence examination approved by the board. The board is authorized to adopt rules and regulations relating to the score that such individual shall be required to receive in order to pass the multi-state jurisprudence examination. The board shall only accept a passing score on an examination required for licensure from an applicant's first five attempts taking such examination. Such individual shall file proof satisfactory to the board of having the education and training required of applicants for licensure under the provisions of the pharmacy act of this state. Individuals who are registered or licensed as pharmacists by examination in other states shall be required to satisfy only the requirements that existed in this state at the time they become registered or licensed in such other states. The provisions of this subsection shall apply only if the state in which the individual is registered or licensed grants, under like conditions, reciprocal registrations or licenses as pharmacists, without examination, to pharmacists duly licensed by examination in this state. Reciprocal licensure shall not be denied to any applicant otherwise qualified for reciprocal licensure under this section who has met the internship requirements of the state from which the applicant is reciprocating or who has at least one year of practice as a licensed pharmacist. A reciprocal licensure may be denied for any of the reasons set forth in K.S.A. [65-1627](#)(a)(1) through (a)(13), and amendments thereto.

(e) In the event that an applicant for reciprocal licensure has not been subject to laws requiring continuing education as a condition for renewal of a registration or license, such applicant shall be required to satisfy the board through a competency examination that the applicant has the knowledge and ability to meet Kansas standards for licensure as a pharmacist.

(f) All applicants for reciprocal licensure shall file their applications on a form to be prescribed and furnished by the board and such application shall be accompanied by a reciprocal licensure fee fixed by the board as provided in K.S.A. [65-1645](#), and amendments thereto. The reciprocal licensure fee established by this section immediately prior to the effective date of this act shall continue in effect until a different reciprocal licensure fee is fixed by the board by rules and regulations as provided in K.S.A. [65-1645](#), and amendments thereto.

(g) The board shall take into consideration any felony conviction of such individual, but such conviction shall not automatically operate as a bar to licensure.

(h) All applicants for licensure who graduate from a school or college of pharmacy outside the United States or who graduate from a school or college of pharmacy not approved by the board shall submit information to the board, as specified by rules and regulations, and this information shall be accompanied by an evaluation fee fixed by the board as provided in K.S.A. [65-1645](#), and amendments thereto, that shall be in addition to any other fee paid by the applicant under the pharmacy act of the state of Kansas. The evaluation fee fixed by the board under this section immediately prior to the effective date of this act shall continue in effect until a different evaluation fee is fixed by the board by rules and regulations as provided in K.S.A. [65-1645](#), and amendments thereto. The board may contract with investigative agencies, commissions or consultants to assist the board in obtaining information about such schools or colleges of pharmacy. In entering such contracts the authority to approve schools or colleges of pharmacy shall remain solely with the board.

(i) All applicants for licensure who graduate from a school or college of pharmacy outside the United States or who are not citizens of the United States shall provide proof to the board that the applicant has a reasonable ability to communicate with the general public in English. The board may require such applicant to take the test of English as a foreign language and to attain the grade for passing such test as established by the board by rules and regulations.

(j) Every registered pharmacist holding a valid registration as a pharmacist in effect on the day preceding the effective date of this act shall be deemed to be a licensed pharmacist under this act, and such individual shall not be required to file an original application hereunder for a license.

65-1632. Renewal of license; fee; denial; conditions; continuing education; inactive status license; reinstatement after nonrenewal; penalty fee.

(a) Except as otherwise provided in this section, each license to practice as a pharmacist issued by the board, shall expire every two years. The expiration date shall be established by rules and regulations adopted by the board. Each application for renewal of a license as a pharmacist shall be made on a form prescribed and furnished by the board. Except as otherwise provided in this subsection, the application, when accompanied by the renewal fee and received by the executive secretary of the board on or before the date of expiration of the license, shall have the effect of temporarily renewing the applicant's license until actual issuance or denial of the renewal. If at the time of filing a proceeding is pending before the board which may result in the suspension, probation, revocation or denial of the applicant's license, the board may by emergency order declare that the application for renewal shall not have the effect of temporarily renewing such applicant's license. Every licensed pharmacist shall pay to the secretary of the board a renewal fee fixed by the board as provided in K.S.A. 65-1645, and amendments thereto.

(b) To provide for a system of biennial renewal of licenses, the board may provide by rules and regulations that licenses issued or renewed may expire less than two years from the date of issuance or renewal. License fees may be prorated for licensure periods which are less than biennial in accordance with rules and regulations of the board.

(c) The board may deny renewal of any license of a pharmacist on any ground which would authorize the board to deny an initial application for licensure or on any ground which would authorize the board to suspend, revoke or place on probation a license previously granted. Orders under this section, and proceedings thereon, shall be subject to the provisions of the Kansas administrative procedure act.

(d) The payment of the renewal fee by a person who is a holder of a license as a pharmacist shall entitle the person to renewal of license if no grounds exist for denying the renewal of the license and if the person has furnished satisfactory evidence to the board that the person has successfully complied with the rules and regulations of the board relating to continuing professional education. These educational requirements shall be fixed by the board at not less than 20 clock hours nor more than 40 clock hours biennially of a program of continuing education approved by the board. Continuing education hours may be prorated for licensure periods which are less than biennial in accordance with rules and regulations of the board. The maximum number of continuing education hours required by the board to meet the requirements for cancellation of inactive status licensure and renewal of license under subsection (e) or reinstatement of license because of nonpayment of fees under subsection (f) shall not exceed 60.

(e) The payment of the renewal fee by the person who is a holder of a license as a pharmacist but who has not complied with the continuing education requirements fixed by the board, if no grounds exist for denying the renewal of the license other than that the person has not complied with the continuing education requirements fixed by the board, shall entitle the person to inactive status licensure by the board. No person holding an inactive status license from the board shall

engage in the practice of pharmacy in this state. Upon furnishing satisfactory evidence to the board of compliance with the continuing education requirements fixed by the board and upon the payment to the board of all applicable fees, a person holding an inactive status license from the board shall be entitled to cancellation of the inactive status license and to renewal of licensure as a pharmacist.

(f) If the renewal fee for any pharmacist's license has not been paid prior to the expiration of the license of the renewal year, the license is hereby declared void, and no license shall be reinstated except upon payment of any unpaid renewal fee plus a penalty fee fixed by the board as provided in K.S.A. 65-1645, and amendments thereto, and proof satisfactory to the board of compliance with the continuing education requirements fixed by the board. The penalty fee established by this section immediately prior to the effective date of the act shall continue in effect until a different penalty fee is fixed by the board by rules and regulations as provided in K.S.A. 65-1645, and amendments thereto. Payment of any unpaid renewal fee plus a penalty fee and the submission of proof satisfactory to the board of compliance with the continuing education requirements fixed by the board shall entitle the license to be reinstated. The nonpayment of renewal fees by a previously licensed pharmacist for a period exceeding three years shall not deprive the previously licensed pharmacist of the right to reinstate the license upon the payment of any unpaid fees and penalties and upon compliance with the continuing education requirements fixed by the board, except that the board may require such previously licensed pharmacist to take and pass an examination approved by the board for reinstatement as a pharmacist and to pay any applicable application fee.

If any person intentionally adulterates or mislabels any drugs, medicines, chemicals or poisons, or causes the same to be adulterated or mislabeled or exposed for sale knowing the same to be adulterated or mislabeled, such person shall be guilty of a class A misdemeanor.

65-1635. Dispensing and administering of drugs by duly licensed practitioners, nurses and other persons.

(a) Nothing contained in the pharmacy act of the state of Kansas shall prohibit any duly licensed practitioner from purchasing and keeping drugs, from compounding prescriptions or from administering, supplying or dispensing to such practitioner's patients such drugs as may be fit, proper and necessary. Except as provided in subsection (b) or (c), such drugs shall be dispensed by such practitioner and shall comply with the Kansas food, drug and cosmetic act and be subject to inspection as provided by law.

(b) Nothing contained in the pharmacy act of the state of Kansas shall be construed to prohibit any nurse or other person, acting under the direction of a duly licensed practitioner, from administering drugs to a patient.

(c) Nothing contained in the pharmacy act of the state of Kansas shall be construed to prohibit any registered nurse, acting under the supervision of a person who is licensed to practice medicine and surgery as of July 1, 1982, from dispensing drugs to patients of such person so long as the principal office of such person is, and as of July 1, 1982, was, located in a city not having a registered pharmacy within its boundaries. For the purposes of this subsection (c), "supervision" means guidance and direction of the dispensing of drugs by the person licensed to practice medicine and surgery who shall be physically present in the general location at which the drugs are being dispensed.

(d) Nothing contained in the pharmacy act of the state of Kansas shall be construed to prohibit a duly registered wholesale distributor from distributing a prescription-only drug pursuant to a veterinarian practitioner's written prescription or order, where a valid veterinarian-client-patient relationship, VCPR, as defined in K.S.A. 47-816, and amendments thereto, exists, to the layman responsible for the control of the animal.

(e) Nothing contained in the pharmacy act of the state of Kansas shall require an in-person examination or encounter between a person licensed to practice medicine and surgery and the patient prior to a pharmacist filling or refilling any prescription.

(a) A pharmacist, or a pharmacy student, intern or pharmacy technician who is 18 years of age or older and working under the direct supervision and control of a pharmacist, may administer influenza vaccine to a person six years of age or older and may administer vaccine, other than influenza vaccine, to a person 12 years of age or older pursuant to a vaccination protocol if the pharmacist, pharmacy student, intern or pharmacy technician has successfully completed a course of study and training, approved by the accreditation council for pharmacy or the board, in vaccination storage, protocols, injection technique, emergency procedures and recordkeeping and has taken a course in cardiopulmonary resuscitation (CPR) and has a current CPR certificate when administering vaccine. A pharmacist, pharmacy student, intern or pharmacy technician who successfully completes such a course of study and training shall maintain proof of completion and, upon request, provide a copy of such proof to the board.

(b) All vaccinees will be given a written immunization record for their personal files. The administering pharmacist or pharmacist supervising an administering pharmacy student, intern or pharmacy technician shall promptly report a record of the immunization to the vaccinee's

primary care provider by mail, electronic facsimile, email or other electronic means. If the vaccinee does not have a primary care provider, then the administering pharmacist or pharmacist supervising an administering pharmacy student, intern or pharmacy technician shall promptly report a record of the immunization to the person licensed to practice medicine and surgery by the state board of healing arts who has entered into the vaccination protocol with the pharmacist. The immunization will also be reported to appropriate county or state immunization registries, except that if the person vaccinated or, if the person is a minor, the parent or guardian of the minor, objects to the report, the report shall not be made.

(c) A pharmacist, pharmacy student, intern or pharmacy technician shall not delegate to any person the authority granted under this act to administer a vaccine.

(d) As used in this section, “pharmacist” means a pharmacist as defined in K.S.A. 65-1626, and amendments thereto, who has:

(1) Successfully completed a course of study and training, approved by the accreditation council for pharmacy or the board, in vaccination storage, protocols, injection technique, emergency procedures and recordkeeping;

(2) taken a course in cardiopulmonary resuscitation (CPR); and

(3) a current CPR certificate.

65-1636. Sale of drugs limited to pharmacies; violations; exceptions.

(a) Except as otherwise provided in this act, the sale and dispensing of drugs shall be limited to pharmacies operating under registrations as required by this act, and the actual sale or dispensing of drugs shall be made by a pharmacist or other persons acting under the immediate personal direction and supervision of the pharmacist.

(b) The donation, acceptance, transfer, distribution or dispensing of any drug in compliance with the provisions of the utilization of unused medications act and any rules and regulations promulgated thereunder shall not constitute a violation of this section.

History: L. 1953, ch. 290, § 22; L. 1975, ch. 319, § 22; L. 1986, ch. 231, § 24; L. 2009, ch..48, § 1; L. 2013, ch. 114, § 7; L. 2017, ch. 34, § 5; April 20.

65-1637. Prescription orders; requirements; compounding, filling and refilling of prescriptions; refusal to fill; brand exchange; interchangeable biological products.

(a) The pharmacist shall exercise professional judgment regarding the accuracy, validity and authenticity of any prescription order consistent with federal and state laws and rules and regulations. Except as provided in K.S.A. [65-1635](#) (e), and amendments thereto, and as may otherwise be provided by law, a pharmacist shall not dispense a prescription drug if the pharmacist, in the exercise of professional judgment, determines that the prescription is not a valid prescription order.

(b) The prescriber may authorize an agent to transmit to the pharmacy a prescription order orally, by facsimile transmission or by electronic transmission, provided that the first and last names of the transmitting agent are included in the order.

(c) (1) A new written or electronically prepared and transmitted prescription order shall be manually or electronically signed by the prescriber. If transmitted by the prescriber's agent, the first and last names of the transmitting agent shall be included in the order.

(2) If the prescription is for a controlled substance and is written or printed from an electronic prescription application, the prescription shall be manually signed by the prescriber prior to delivery of the prescription to the patient or prior to facsimile transmission of the prescription to the pharmacy.

(3) An electronically prepared prescription shall not be electronically transmitted to the pharmacy if the prescription has been printed prior to electronic transmission. An electronically prepared and transmitted prescription that is printed following electronic transmission shall be clearly labeled as a copy, not valid for dispensing.

(4) The board is hereby authorized to conduct pilot projects related to any new technology implementation when deemed necessary and practicable, except that no state moneys shall be expended for such purpose.

(d) An authorization to refill a prescription order or to renew or continue an existing drug therapy may be transmitted to a pharmacist through oral communication, in writing, by facsimile transmission or by electronic transmission initiated by or directed by the prescriber.

(1) If the transmission is completed by the prescriber's agent, and the first and last names of the transmitting agent are included in the order, the prescriber's signature is not required on the fax or alternate electronic transmission.

(2) If the refill order or renewal order differs in any manner from the original order, such as a change of the drug strength, dosage form or directions for use, the prescriber shall sign the order as provided by subsection (c)(1).

(e) Regardless of the means of transmission to a pharmacy, a pharmacist or a pharmacist intern shall be authorized to receive a new prescription order or a refill or renewal order from a prescriber or transmitting agent. A registered pharmacy technician may receive a refill, renewal or order for continuation of therapy that contains no changes from the original prescription from a prescriber or transmitting agent if such registered pharmacy technician's supervising pharmacist has authorized that function.

(f) A refill is one or more dispensings of a prescription drug or device that results in the patient's receipt of the quantity authorized by the prescriber for a single fill as indicated on the prescription order.

A prescription for a schedule III, IV or V controlled substance may authorize no more than five refills within six months following the date on which the prescription is issued.

(g) All prescriptions shall be filled or refilled in strict conformity with any directions of the prescriber, except that:

(1) A pharmacist who receives a prescription order for a brand name drug product may exercise brand exchange with a view toward achieving a lesser cost to the purchaser unless:

(A) The prescriber indicates "dispense as written" on the prescription or when communicating a prescription by oral order;

(B) the FDA has determined that a biological product is not an interchangeable biological product for the prescribed biological product; or

(C) the FDA has determined that a drug product of the same generic name is not bioequivalent to the prescribed brand name prescription medication;

(2) a pharmacist may provide up to a three-month supply of a prescription drug that is not a controlled substance or psychotherapeutic drug when a practitioner has written a drug order to be filled with a smaller supply but included sufficient numbers of refills for a three-month supply; or

(3) except for a prescription for a controlled substance, a pharmacist may use professional judgment to make the following adaptations to a prescription order if a patient consents, the prescriber has not indicated "dispense as written" on the prescription, the pharmacist documents the adaptation on the patient's prescription record and the pharmacist notifies the prescriber:

(A) Change the prescribed quantity if:

- (i) The prescribed quantity or package size is not commercially available;
 - (ii) the change in quantity is related to a change in dosage form; or
 - (iii) the change extends a maintenance drug for the limited quantity necessary to coordinate a patient's refills in a medication synchronization program;
- (B) change the prescribed dosage form, strength or directions for use if it is in the best interest of the patient and the change achieves the intent of the prescriber; or
- (C) complete missing information on the prescription order if there is evidence to support the change.
- (h) A pharmacist who selects an interchangeable biological product shall inform the patient or the patient's representative that an interchangeable biological product has been substituted for the prescribed biological product.
- (i) If a prescription order contains a statement that during any particular time the prescription may be refilled at will, there shall be no limitation as to the number of times that such prescription may be refilled, except that it may not be refilled after the expiration of the time specified or one year after the prescription was originally issued, whichever occurs first.
- (j) Prescription orders shall be recorded in writing by the pharmacist and the record so made by the pharmacist shall constitute the original prescription to be dispensed by the pharmacist. This record, if telephoned by other than the prescriber, shall bear the full name of the individual so telephoning. Nothing in this section shall be construed as altering or affecting in any way laws of this state or any federal act requiring a written prescription order.
- (k) (1) Except as provided in paragraph (2), no prescription shall be refilled unless authorized by the prescriber either in the original prescription or by oral order that is reduced promptly to writing and filled by the pharmacist.
- (2) A pharmacist may refill a prescription order issued on or after the effective date of this act for any prescription drug, except a drug listed on schedule II of the uniform controlled substances act or a narcotic drug listed on any schedule of the uniform controlled substances act, without the prescriber's authorization when all reasonable efforts to contact the prescriber have failed and when, in the pharmacist's professional judgment, continuation of the medication is necessary for the patient's health, safety and welfare. Such prescription refill shall only be in an amount judged by the pharmacist to be sufficient to maintain the patient until the prescriber can be contacted, but in no event shall a refill under this paragraph be more than a 30-day supply or one package of the drug. However, if the prescriber states on a prescription that there shall be no emergency refilling of that prescription, then the pharmacist shall not dispense any emergency medication pursuant to that prescription. A pharmacist who refills a prescription order under this paragraph shall contact the prescriber of the prescription order on the next business day subsequent to the refill or as soon thereafter as possible. No pharmacist shall be required to refill any prescription order under this paragraph. A prescriber shall not be subject to liability for any damages resulting from the refilling of a prescription order by a pharmacist under this paragraph unless such damages are occasioned by the gross negligence or willful or wanton acts or omissions by the prescriber.
- (l) If any prescription order contains a provision that the prescription may be refilled a specific number of times within or during any particular period, such prescription shall not be refilled except in strict conformity with such requirements.
- (m) Any pharmacist who exercises brand exchange and dispenses a less expensive drug product shall not charge the purchaser more than the regular and customary retail price for the dispensed drug.
- (n) Except as provided in K.S.A. [65-1635](#) (e), and amendments thereto, and as may otherwise be provided by law, nothing contained in this section shall be construed as preventing a pharmacist from refusing to fill or refill any prescription if, in the pharmacist's professional judgment and discretion, such pharmacist is of the opinion that it should not be filled or refilled.

(o) Within five business days following the dispensing of a biological product, the dispensing pharmacist or the pharmacist's designee shall make an entry of the specific product provided to the patient, including the name of the product and the manufacturer. The communication shall be conveyed by making an entry that is electronically accessible to the prescriber through:

- (1) An interoperable electronic medical records system;
- (2) an electronic prescribing technology;
- (3) a pharmacy benefits management system; or
- (4) a pharmacy record.

(p) Entry into an electronic records system as described in subsection (o) shall be presumed to provide notice to the prescriber. Otherwise, the pharmacist shall communicate the biological product dispensed to the prescriber using facsimile, telephone, electronic transmission or other prevailing means, provided that communication shall not be required where:

- (1) There is no FDA-approved interchangeable biological product for the product prescribed; or
- (2) a refill prescription is not changed from the product dispensed on the prior filling of the prescription.

(q) A pharmacist shall maintain a record of any biological product dispensed for at least five years.

(r) The board shall maintain a link on its website to the current lists of all biological products that the FDA has determined to be interchangeable biological products.

Applications for a nonresident pharmacy registration under this section shall be made on a form furnished by the board. A nonresident pharmacy registration shall be granted for a period of one year upon compliance by the nonresident pharmacy with the provisions of this section and rules and regulations adopted pursuant to this section and upon payment of the registration fee established under K.S.A. [65-1645](#), and amendments thereto, for a pharmacy registration. (7) provide to the board such other information as the board may reasonably request to administer the provisions of this section.

(c) Each nonresident pharmacy shall comply with the following unless compliance would be in conflict with specific laws or rules and regulations of the state in which the pharmacy is located:

(2) labeling of all prescriptions dispensed, to include, but not be limited to, identification of the product and quantity dispensed;

(f) The board may limit, condition, revoke, suspend or place in a probationary status a registration or deny an application for issuance or renewal of any registration on any ground that would authorize the board to take action against the registration of a pharmacy under K.S.A. [65-1627](#), and amendments thereto.

(g) The board shall adopt rules and regulations that make exceptions to the requirement of registration by a nonresident pharmacy when the out-of-state pharmacy supplies lawful refills to a patient from a prescription that was originally filled and delivered to a patient within the state in which the nonresident pharmacy is located, or when the prescriptions being mailed into the state of Kansas by a nonresident pharmacy occurs only in isolated transactions. In determining whether the prescriptions being mailed into the state of Kansas by a nonresident pharmacy are isolated transactions, the board shall consider whether the pharmacy has promoted its services in this state and whether the pharmacy has a contract with any employer or organization to provide pharmacy services to employees or other beneficiaries in this state.

(h) It is unlawful for any nonresident pharmacy that is not registered under this act to advertise its services in this state, or for any person who is a resident of this state to advertise the pharmacy services of a nonresident pharmacy that has not registered with the board, with the knowledge that the advertisement will or is likely to induce members of the public in this state to use the pharmacy to fill prescriptions.

These procedures shall be consistent with the following requirements:

(2)(A) An interim supply of prepackaged drugs shall be supplied to an outpatient on an emergency basis only by a designated registered professional nurse or nurses pursuant to a prescriber's medication order when a pharmacist is not on the premises and a prescription cannot be filled. The interim supply shall be labeled in accordance with K.A.R. 68-7-14.

(B) The interim supply shall be limited in quantity to an amount sufficient to supply the outpatient's needs until a prescription can be filled. Adequate records of the distribution of the interim supply shall be maintained and shall include the following information:

(i) The original or a copy of the prescriber's order or, if an oral order, a written record prepared by a designated registered professional nurse or nurses that reduces the oral order to writing. (b) Annually, the board shall submit to the speaker of the house of representatives and the president of the senate a report on substances proposed by the board for scheduling, rescheduling or deletion by the legislature with respect to any one of the schedules as set forth in this act and a report of the substances scheduled during the preceding calendar year under subsection (e), if any, along with the reasons for the proposal and the scheduling. In making a determination regarding the proposal to schedule, reschedule or delete a substance, the board shall consider the following:

- (1) The actual or relative potential for abuse;
- (2) the scientific evidence of its pharmacological effect, if known;
- (3) the state of current scientific knowledge regarding the substance;
- (4) the history and current pattern of abuse;

- (5) the scope, duration and significance of abuse;
 - (6) the risk to the public health;
 - (7) the potential of the substance to produce psychological or physiological dependence liability; and
 - (8) whether the substance is an immediate precursor of a substance already controlled under this article.
- (c) The board shall not include any nonnarcotic substance within a schedule if such substance may be lawfully sold over the counter without a prescription under the federal food, drug and cosmetic act.
- (d) Authority to control under this section does not extend to distilled spirits, wine, malt beverages or tobacco.
- (e) (1) Upon receipt of notice under K.S.A. 2017 Supp. 21-5715, and amendments thereto, or upon the board's finding of an imminent hazard to the public safety, the board shall initiate scheduling of the controlled substance analog or a new drug, as defined in this subsection, on an emergency basis pursuant to this subsection. The scheduling of a substance under this subsection expires on July 1 of the following calendar year after the adoption of the scheduling rule and regulation.
- (2) With respect to the finding of an imminent hazard to the public safety, the board shall consider whether the substance has been scheduled on a temporary basis under federal law or factors set forth in subsections (b)(4), (5) and (6), and may also consider clandestine importation, manufacture or distribution, and if available, information concerning the other factors set forth in subsection (b).
- (3) A rule and regulation may not be adopted under this subsection until the board initiates a rulemaking proceeding under subsection (a) with respect to the substance. A rule and regulation adopted under this subsection shall expire on July 1 of the calendar year following the year of its adoption.
- (4) As used in this subsection, "new drug" means: (A) Any drug the composition of which is such that such drug is not generally recognized, among experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs, as safe and effective for use under the conditions prescribed, recommended or suggested in the labeling thereof; or (B) any drug the composition of which is such that such drug, as a result of investigations to determine its safety and effectiveness for use under such conditions, has become so recognized, but that has not, other than in such investigations, been used to a material extent or for a material time under such conditions. The term "new drug" shall not include amygdalin (laetrile).

65-4117. Registration.

(a) The board shall register an applicant to manufacture, dispense or distribute controlled substances included in K.S.A. 65-4105, 65-4107, 65-4109, 65-4111 and 65-4113, and amendments to these sections, unless it determines that the issuance of that registration would be inconsistent with the public interest. In determining the public interest, the board shall consider the following factors:

- (1) Maintenance of effective controls against diversion of controlled substances into other than legitimate medical, scientific or industrial channels;
- (2) compliance with applicable state and local law;
- (3) any conviction of the applicant under any federal and state laws relating to any controlled substance;
- (4) past experience in the manufacture, dispensing or distribution of controlled substances and the existence in the applicant's establishment of effective controls against diversion;
- (5) furnishing by the applicant of false or fraudulent material in any application filed under this act;

- (6) suspension or revocation of the applicant's federal registration to manufacture, distribute or dispense controlled substances as authorized by federal law; and
 - (7) any other factors relevant to and consistent with the public health and safety.
 - (b) Registration under subsection (a) does not entitle a registrant to manufacture and distribute controlled substances in schedule I or II other than those specified in the registration.
 - (c) Practitioners shall be registered to dispense any controlled substances or to conduct research with controlled substances in schedules II through V if they are authorized to prescribe or to conduct research under the laws of this state.
 - (d) Pharmacists shall be registered to dispense schedule I designated prescription substances and controlled substances in schedules II through V if none of the grounds for revocation, suspension or refusal to renew a registration exist at the time of application.
 - (e) The board need not require separate registration under this act for practitioners or pharmacists engaging in research with nonnarcotic controlled substances in schedules II through V where the registrant is already registered under this act in another capacity. Practitioners or pharmacists registered under federal law to conduct research with schedule I substances may conduct research with schedule I substances within this state upon furnishing the board evidence of that federal registration.
 - (f) Compliance by manufacturers and distributors with the provisions of the federal law respecting registration (excluding fees) entitles them to be registered under this act.

65-4118. Revocation and suspension of registration.

- (a) A registration under K.S.A. 65-4117 to manufacture, distribute or dispense a controlled substance may be suspended or revoked by the board upon a finding that the registrant:
 - (1) Has furnished false or fraudulent material information in any application filed under this act;
 - (2) has been convicted of a felony under any state or federal law relating to any controlled substance;
 - (3) has violated any rule or regulation of the board controlling the manufacture, distribution or dispensing of the controlled substances contained in the schedules promulgated in the rules and regulations of the board; or
 - (4) has had his federal registration suspended or revoked to manufacture, distribute or dispense controlled substances.
- (b) The board may limit revocation or suspension of a registration to the particular controlled substance with respect to which grounds for revocation or suspension exist.
- (c) If the board suspends or revokes a registration, all controlled substances owned or possessed by the registrant at the time of suspension or the effective date of the revocation order may be placed under seal. No disposition shall be made of substances under seal until the time for taking an appeal has elapsed or until all appeals have been concluded unless a court upon application therefor orders the sale of perishable substances and the deposit of the proceeds of the sale with the court. Upon a revocation order becoming final, all controlled substances shall be forfeited to the state.
- (d) The board shall promptly notify the bureau of all orders suspending or revoking registration and all forfeitures of controlled substances.

65-4119. Denial, suspension, revocation or refusal to renew registration; order to show cause.

(a) Before denying, suspending or revoking a registration or refusing a renewal of registration, the board shall serve upon the applicant or registrant an order to show cause why registration should not be denied, revoked or suspended or why the renewal should not be refused. In the case of a denial or renewal of registration the show cause order shall be served not later than 15 days before the expiration of the registration. Proceedings on a show cause order shall be conducted in accordance with the provisions of the Kansas administrative procedure act without regard to any criminal prosecution or other proceeding.

(b) In accordance with the provisions of K.S.A. 77-536 and amendments thereto, the board may suspend, without an order to show cause, any registration simultaneously with the institution of proceedings under K.S.A. 65-4118 and amendments thereto, or where renewal of registration is refused, if it finds that there is an imminent danger to the public health or safety which warrants this action. The suspension shall continue in effect until the conclusion of the proceedings, including judicial review thereof, unless sooner withdrawn by the board or dissolved by a court of competent jurisdiction.

(b) Except when dispensed by a practitioner, other than a pharmacy, to an ultimate user, no controlled substance in schedule II may be dispensed without the written or electronic prescription of a prescriber. In emergency situations, as defined by rules and regulations of the board, schedule II drugs may be dispensed upon oral prescription of a prescriber reduced

(c) Except when dispensed by a practitioner, other than a pharmacy, to an ultimate user, a controlled substance included in schedule III, IV, or V which is a prescription drug shall not be dispensed without either a paper prescription manually signed by a prescriber, a facsimile of a manually signed paper prescription transmitted by the prescriber or the prescriber's agent to the pharmacy, an electronic prescription that has been digitally signed by a prescriber with a digital certificate, or an oral prescription made by an individual prescriber and promptly reduced to writing. The prescription shall not be filled or refilled more than six months after the date thereof or be refilled more than five times.

(d) Exemption of agents and employees; affiliated practitioners.

(1) Practitioners, mid-level practitioners, pharmacists, and other persons required to register under this act shall not be exempt from registration because of their status as an agent or

employee of a person who is already registered to engage in any group of independent activities. The requirements of registration, however, shall be waived for any agent or employee of a person who is registered to engage in any group of independent activities, if the agent or employee is acting in the usual course of his business or employment.

(2) A practitioner who is an intern, resident, or foreign physician or medical graduate may dispense and prescribe controlled substances under the registration of the hospital or other institution that is registered and by whom the person is employed if all of the following conditions are met:

(D) The practitioner is acting only within the scope of employment in the hospital or institution.

(E) The hospital or other institution authorizes the intern, resident, or foreign physician or medical graduate to dispense or prescribe under the hospital registration and designates a specific internal registration code number for each intern, resident, or foreign physician or medical graduate so authorized. The code number shall consist of numbers, letters, or a combination of both and shall be a suffix to the institution's drug enforcement administration registration number, preceded by a hyphen.

(F) A current list of internal codes and the corresponding practitioners is kept by the hospital or other institution, and an updated copy is on file with the state board of pharmacy of the state of Kansas for the purposes of verifying the authority of the prescribing practitioner.

(e) Exemption of certain military and other personnel.

(1) The requirement of registration shall be waived for any official of the U.S. army, navy, marine corps, air force, coast guard, or public health service who is authorized to prescribe, dispense, or administer, but not to procure or purchase, controlled substances in the course of official duties. These officials shall follow the procedures set forth in K.A.R. 68-20-18, 68-20-19, 68-20-20, and 68-20-21, but shall state the branch of service or agency and the service identification number of the issuing official in lieu of the registration number required on prescription forms. The service identification number for a public health service employee is the person's social security identification number.

(2) If any official exempted by this subsection also engages as a private individual in any activity or group of activities for which registration is required, the official shall obtain a registration for these private activities.

(f) Exemption of law enforcement officials.

(1) The requirement of registration shall be waived for the following persons in the circumstances described in this subsection:

(2) Any official exempted by this subsection may, when acting in the course of official duties, possess any controlled substance and distribute any such substance to any other official who is also exempted by this subsection and acting in the course of official duties.

(3) Any official exempted by this subsection may procure any controlled substance in the course of an inspection, in accordance with the controlled substances act, K.S.A. 65-4131(c) and amendments thereto, or in the course of any criminal investigation involving the person from whom the substance was procured.

(4) In order to enable law enforcement agency laboratories to obtain and transfer controlled substances for use as standards in chemical analysis, these laboratories shall obtain annually a registration to conduct chemical analysis. These laboratories shall be exempted from payment of a fee for registration. Laboratory personnel, when acting in the scope of their official duties, shall be deemed to be officials exempted by this subsection and within the activities described in the controlled substances act, K.S.A. 65-4115 and amendments thereto. For purposes of this subsection, laboratory activities shall not include field or other preliminary chemical tests by officials exempted by this subsection.

(g) Exemption of civil defense officials.

(A) Maintain, and distribute for maintenance, controlled substances held for emergency use; or

These forms may be used and shall be valid only during a state of emergency disaster proclaimed by the president or by a concurrent resolution of the congress for the area in which the organization using the forms has civil defense or disaster relief jurisdiction, who shall state the position and the nature and legal designation of the emergency or disaster. hearing will be unduly prejudiced and the ends of justice will thereby be served. Such notice of modification or waiver shall be made a part of the records of the hearing.

(c) Hearing; waiver.

(1) Any person entitled to a hearing may file with the board a waiver of an opportunity for a hearing or to participate in a hearing, together with a written statement regarding his position on the matters of fact and law involved in such hearing. Such statement, if admissible, shall be made a part of the record and shall be considered in light of the lack of opportunity for cross-examination in determining the weight to be attached to matters of fact asserted therein.

(2) If any person entitled to a hearing or to participate in a hearing waives his opportunity to participate in the hearing, the board may proceed without the presence of such person.

(d) Burden of proof.

(1) At any hearing for the denial of a registration, the board shall have the burden of proving that the requirements of such registration pursuant to the act (K.S.A. 65-4117, K.S.A. 65-4118) are not satisfied.

(2) At any hearing for the revocation or suspension of a registration, the board shall have the burden of proving that the requirements for such revocation or suspension in accordance with the provisions of the act (K.S.A. 65-4119).

(e) Time and place of hearing-The hearing will commence at the place and time designated in the order to show cause (unless expedited pursuant to paragraph 68-20-12D of these regulations) but thereafter, it may be moved to a different place and may be continued from day to day or recessed to a later day without notice other than announcement thereof by the presiding officer at the hearing.

(f) Final order-As soon as practicable after the presiding officer has certified the record to the board, the board shall issue its order on the granting, denial, revocation or suspension of the registration. In the event that any application for registration is denied, or any registration is revoked or suspended, the order shall include the findings of fact and conclusions of law upon which the order is based. The order shall specify the date on which it shall take effect. The board shall serve one copy of its order upon each party in the hearing by registered, return receipt requested mail.

The letter shall contain the registrant's name, address, registration number and the substance and/or schedules to be added to his registration and shall be signed by the same person who signed the most recent application for registration or reregistration. If the registrant is seeking to handle additional controlled substances listed in schedule I for the purpose of research or instructional activities, he shall attach one copy of the federally approved research protocol describing each research project involving the additional substances, or two copies of a statement describing the nature, extent and duration of such instructional activities, as appropriate. One-half of the original fees shall be required to be paid for said modification. The request for modification shall be handled in the same manner as an application for registration.

(b) Termination of registration-The registration of any person or location shall terminate if and when such person or authorized representative of a location dies, ceases legal existence,

discontinues business or professional practice or changes the location as shown on the certificate of registration. Any registrant who ceases legal existence, discontinues business or professional practice, or changes location as shown on the certificate of registration, shall notify the board promptly of such fact and forthwith deliver the certificate of registration directly to the secretary or executive secretary of the board. In the event of a change in name or mailing address the person or authorized representative of the location shall notify the board promptly in advance of the effective date of this change by filing the change of name or mailing address with the board. This change shall be noted on the original application on file with the board.

(c) Transfer of registration-No registration or any authority conferred thereby shall be assigned or otherwise transferred except upon such conditions as the board may specifically designate and then only pursuant to its written consent.

(2) is either registered or exempted from registration under K.S.A. 65-4116 or K.S.A. 65-4117 and amendments thereto.

(b)(1) To be valid, a prescription for a controlled substance shall be issued for a legitimate medical purpose by a prescriber acting in the usual course of professional practice. The responsibility for the proper prescribing and dispensing of controlled substances shall rest with the prescriber, but a corresponding responsibility shall rest with the pharmacist who fills the prescription. The individual filling an unlawful prescription, as well as the individual issuing it, shall be subject to the penalties provided for violations of the provisions of the act.

(2) A pharmacist shall not fill a prescription for a controlled substance or drug of concern for office use. However, any pharmacist may document on an invoice any distribution of controlled substances or drugs of concern made to a registrant.

(3) A prescription shall not be issued for the dispensing of narcotic drugs listed in any schedule to a narcotic drug-dependent individual for the purpose of continuing dependence upon these drugs, except as allowed by 21 C.F.R. 1306.07(d), as in effect on November 2, 2020, or in the course of conducting an authorized clinical investigation in the development of a narcotic addict rehabilitation program.

(c)(1) To be valid, a prescription for a controlled substance shall not be issued on a prescription blank that is preprinted or rubber-stamped with the name of a propriety preparation or with the strength, quantity, or directions.

A corresponding liability shall rest upon the pharmacist who fills a prescription that is not prepared in the form prescribed by this regulation.

(5) Each intern, resident, foreign physician, or foreign medical graduate exempted from registration under K.S.A. 65-4116, and amendments thereto, shall include on all prescriptions issued the registration number of the hospital or other institution and the special internal code number assigned to the intern, resident, foreign physician, or foreign medical graduate by the hospital or other institution as provided in K.A.R. 68-20-10. (6) Each official exempted from registration under K.A.R. 68-20-10 shall include on all prescriptions issued the official's branch of service or agency and the service identification number. This requirement shall be in lieu of the registration number of the prescriber otherwise required by this subsection. The service identification number for a public health service employee shall be that individual's social security identification number. Each prescription shall have the name of the officer stamped or printed on it, as well as the signature of the officer.

(7) Any controlled substance prescription in schedules III through V may be issued as a paper or electronic prescription or transmitted by a prescriber or the prescriber's designated agent to a pharmacy by oral or facsimile transmission. The hard copy reduction shall include all information required by this regulation, except for the signature of the prescriber in the case of an oral transmission, and, if transmitted by other than the prescriber, shall bear the first name and last name of the person so transmitting the prescription. Each prescription sent by facsimile transmission shall be transmitted directly from the prescriber or the prescriber's designated agent to the pharmacy and shall contain a header identifying the sender of the prescription.

(9) Any pharmacist may fill multiple prescriptions issued by a prescriber authorizing the patient to receive up to a 90-day supply of a schedule II controlled substance if all of the following conditions are met:

(A) Each separate prescription is issued for a legitimate medical purpose by a prescriber acting in the usual course of professional practice.

(B) The prescriber provides written instructions on each prescription other than the first prescription, if the prescriber intends for the first prescription to be filled immediately, indicating the earliest date on which the prescription may be filled.

(C) The prescriber concludes that providing the patient with multiple prescriptions does not create an undue risk of diversion or abuse.

(D) Each separate prescription meets all requirements for a schedule II controlled substances prescription, including being dated and signed on the date issued.

(d) A prescription for controlled substances shall be filled only by the following individuals:

(1) A pharmacist acting in the usual course of professional practice in a registered pharmacy, hospital drug room, or other registered place of employment; or

(2) a pharmacist intern acting under the direct supervision of a pharmacist. (Authorized by K.S.A. 65-4102; implementing K.S.A. 65-4123; effective, E-72-24, Aug. 25, 1972; effective Jan. 1, 1973; amended May 1, 1988; amended Sept. 9, 1991; amended March 29, 1993; amended March 20, 1995; amended Dec. 27, 1999; amended June 2, 2023.)

68-20-18a Information concerning prescriptions; recordkeeping; pharmacy prescription application.

(a) Each controlled substance shall be supplied or dispensed directly to a patient only pursuant to a prescription issued in accordance with K.A.R. 68-20-18. Each controlled substance shall be supplied at a registered facility for immediate facility administration to the ultimate user only pursuant to a medication order.

(b) Each dispensing, partial filling, or refilling of a prescription for a controlled substance shall be entered on the back of the prescription with the date, quantity, and name or initials of the pharmacist providing the final verification.

(c) As an alternative to the procedures provided by subsection (b), a pharmacy prescription application may be used for the storage and retrieval of dispensing, refill, and partial filling information for prescription orders for controlled substances if all of the following requirements are met:

(1) Each computerized system shall provide on-line retrieval, by computer monitor display or hard-copy printout, of original prescription order, refill, and partial fill information for those prescription orders that are authorized for filling. Each display or printout of information shall include the following:

(A) The original prescription number;

(B) the date of issuance of the original prescription order by the prescriber;

(C) the dates of dispensing or partial filling;

(D) the full name and address of the patient;

(E) the name, address, and DEA registration number of the prescriber;

(F) the name, strength, dosage form, quantity of the controlled substance prescribed, and the quantity dispensed, if different from the quantity prescribed;

(G) the identification code, or name or initials of the dispensing pharmacist;

(H) the total number of refills authorized by the prescriber, if applicable and allowable; and

(I) the total number of doses dispensed to date for that prescription order.

(2) Each pharmacist who makes use of a pharmacy prescription application shall document that the information in the pharmacy prescription application is correct each time the pharmacist fills, refills, or partially fills a controlled substance.

(A) If the pharmacy prescription application produces a hard-copy printout of each day's controlled substance prescription order data, the printout shall meet the following requirements:

(i) The printout shall be verified, dated, and signed by the pharmacist who filled or partially filled the prescription order. The pharmacist shall verify that the date indicated is correct and then sign this document in the same manner as the pharmacist would sign a check or legal document.

(ii) The printout shall be provided to each pharmacy using the computerized system within 72 hours of the date on which the controlled substance was dispensed.

(iii) The printout shall be verified and signed by each pharmacist who is involved in the dispensing.

(B) In lieu of signing a hard-copy printout of each day's controlled substance prescription order data, the pharmacy owner shall maintain a bound logbook or separate file in which each pharmacist involved in the dispensing shall sign a statement, in the manner described in paragraph (c)(2)(A), each day, attesting to the fact that the information entered into the pharmacy prescription application that day has been reviewed by the pharmacist and is correct as shown.

(3) Each pharmacy prescription application shall have the capability of producing a printout of any fill data that the facility is responsible for maintaining. Each printout shall include an audit trail for any specified strength and dosage form of any controlled substance, by brand, generic name, or both, in addition to the following:

(A) The name of the prescriber;

(B) the name and address of the patient;

(C) the quantity dispensed on each fill;

(D) the date of dispensing of each fill;

(E) the name or identification code of the dispensing pharmacist; and

(F) the number of the original prescription order.

(4) If a pharmacy experiences a computer system outage of the pharmacy prescription application, the pharmacy shall have an auxiliary procedure that will be used for documentation of partial fills and refills of controlled substance prescriptions. This auxiliary procedure shall ensure that partial fills or refills are authorized by the original prescription, the maximum number of dosage units or refills has not been exceeded, the prescription is still valid for partial filling or refilling, and all appropriate data is retained for on-line data entry as soon as the computer system is available for use again.

(d) All prescriptions, records, and documents required by this article of the board's regulations shall be kept readily retrievable at the registered location for five years from the date of the last filling, refilling, partial filling, or entry into the record, except that financial and shipping records may be kept at other than the registered location with approval of the DEA. (Authorized by and implementing K.S.A. 65-4102, K.S.A. 65-4121, and K.S.A. 65-4123; effective June 2, 2023.)

68-20-19 Controlled substances listed in schedule II.

(a)(1) A pharmacist shall dispense a controlled substance listed in schedule II that is a prescription-only drug only pursuant to a signed prescription issued in accordance with K.A.R. 68-20-18, except as provided in paragraph (a)(4).

(2) A prescription under the provisions of paragraph (a)(1) shall not be filled in either of the following circumstances:

(A) More than 90 days after the original date of issue appearing on the prescription; or

(B) before or after any date specified on the prescription by the prescriber.

(3)(A) For an emergency, as defined by paragraph (a)(4), a pharmacist may dispense a controlled substance listed in schedule II upon receiving the oral authorization of a prescriber, if all of the following requirements are met:

(i) The quantity prescribed and dispensed shall be limited to the amount adequate to treat the patient during the emergency period. Dispensing beyond the emergency period shall be pursuant to a signed prescription issued in accordance with K.A.R. 68-20-18.

- (ii) The prescription shall be immediately reduced to a hard copy by the pharmacist and shall contain all information required under K.A.R. 68-20-18 except for the signature of the prescriber.
- (iii) If the prescriber is not known to the pharmacist, the pharmacist shall make a reasonable effort to determine that the authorization came from the prescriber, which may include a call back to the prescriber, using the prescriber's phone number as listed in the telephone directory or other good faith efforts to ensure the prescriber's identity, or both.
- (iv) Within seven days after authorizing an emergency prescription drug order, the prescriber shall cause a written or electronic prescription drug order for the emergency quantity prescribed to be delivered to the dispensing pharmacist.
- (B) In addition to meeting the requirements of K.A.R. 68-20-18, the prescription drug order shall have written on its face "Authorization for Emergency Dispensing" and the date of the prescription drug order.
- (C) The written or electronic prescription drug order shall be delivered to the pharmacist in person within seven days of authorization or, if the written prescription is delivered by mail, it shall be postmarked within the seven-day period.
- (D) Upon receipt, the dispensing pharmacist shall attach this written prescription drug order to the pharmacist's record of the emergency prescription drug order. For each electronic prescription, the dispensing pharmacist shall annotate the record of the electronic prescription with the original authorization and date of the oral order.
- (E) The pharmacist shall notify the nearest office of the U.S. drug enforcement administration (DEA) if the prescribing practitioner fails to deliver a written or electronic prescription drug order to the pharmacist. Failure of the pharmacist to notify the DEA shall void the authority conferred by this regulation to dispense without a written or electronic prescription of a prescriber.
- (4) For the purposes of authorizing a prescription of any controlled substance listed in schedule II of the federal or state uniform controlled substances act, the term "emergency situation" shall mean any situation in which the prescriber determines the following:
- (A) That immediate administration of the controlled substance is necessary for proper treatment of the intended ultimate user;
- (B) that no appropriate alternative treatment is available, including administration of a drug that is not a controlled substance under schedule II of the act; and
- (C) that it is not reasonably possible for the prescriber to provide a written prescription to be presented, before dispensing, to the pharmacist dispensing the substance.
- (b) The partial filling of a prescription for any controlled substance listed in schedule II shall be permissible, only as provided in this subsection.
- (1) Whenever the pharmacist is unable to supply the full quantity called for in a written, electronic, or emergency prescription and the pharmacist makes a notation of the quantity supplied on the face of the written prescription, written record of the emergency prescription, or electronic prescription record, the pharmacist shall perform the following:
- (A) Fill the remaining portion of the prescription within 72 hours of the first partial filling or, if the remaining portion cannot be filled within the 72-hour period, the pharmacist shall notify the prescriber of the situation; and
- (B) supply no further quantity beyond 72 hours without a new prescription.
- (2) Prescriptions for schedule II controlled substances for patients in a long-term care facility (LTCF) or for a patient with a medical diagnosis documenting a terminal illness may be filled in

partial quantities, including individual dosage units, as provided in this subsection. The pharmacist shall record on the prescription whether the patient is “terminally ill” or an “LTCF patient.”

(A) The total quantity of schedule II controlled substances dispensed in all partial fillings shall not exceed the total quantity prescribed.

(B) These schedule II prescriptions shall be valid for partial filling for a period not to exceed 60 days from the issue date of the prescription unless terminated sooner by the discontinuance of medication.

(3) Any prescription for a schedule II controlled substance may be partially filled at the request of the patient or the prescriber who wrote the prescription. The pharmacist shall not fill or partially fill any remaining portions of the prescription more than 30 days after the date the prescription was written, except as provided by paragraphs (b)(1) and (2). The total quantity of schedule II controlled substances dispensed in all partial fillings shall not exceed the total quantity prescribed.

(c) Each pharmacist filling a written or emergency prescription for a controlled substance listed in schedule II shall ensure that a label that meets the requirements of K.A.R. 68-7-14 and 21 C.F.R. 290.5 is affixed to the package.

(d) All written prescriptions, electronic prescriptions, and written records of emergency prescriptions shall be kept in accordance with K.A.R. 68-20-16. (b) Additional quantities of controlled substances listed in schedule III, IV, or V may be authorized by a prescriber through an oral refill authorization transmitted to the pharmacist if all of the following conditions are met:

(1) The total quantity authorized, including the amount of the original prescription, does not exceed five refills or extend beyond six months from the date of issue of the original prescription.

(2) The pharmacist obtaining the oral authorization records on the reverse of the original prescription the following:

[60-437](#), and amendments thereto, and by subsections (c) and (d), the reports, statements, memoranda, proceedings, findings and other records submitted to or generated by peer review committees or officers shall be privileged and shall not be subject to discovery, subpoena or other means of legal compulsion for their release to any person or entity or be admissible in evidence in any judicial or administrative proceeding. Information contained in such records shall not be discoverable or admissible at trial in the form of testimony by an individual who participated in the peer review process. The peer review officer or committee creating or initially receiving the record is the holder of the privilege established by this section. This privilege may be claimed by the legal entity creating the peer review committee or officer, or by the commissioner of insurance for any records or proceedings of the board of governors.

(c) Subsection (b) shall not apply to proceedings in which a healthcare provider contests the revocation, denial, restriction or termination of staff privileges or the license, registration, certification or other authorization to practice of the healthcare provider. In closing a portion of a hearing as provided by this section, the presiding officer may exclude any person from the hearing location except the licensee, the licensee's attorney, the agency's attorney, the witness, the court reporter and appropriate staff support for either counsel. The licensing agency shall make the portions of the agency record in which such report or record is disclosed subject to a protective order prohibiting further disclosure of such report or record. Such report or record shall not be subject to discovery, subpoena or other means of legal compulsion for their release to any person or entity. A licensing agency conducting a disciplinary proceeding may review peer review committee records, testimony or reports but must prove its findings with independently obtained testimony or records that shall be presented as part of the disciplinary proceeding in open meeting of the licensing agency. Offering such testimony or records in an open public hearing shall not be deemed a waiver of the peer review privilege relating to any peer review committee testimony, records or report.

(d) Nothing in this section shall limit the authority that may otherwise be provided by law of the commissioner of insurance, the state board of healing arts or other healthcare provider licensing or disciplinary boards of this state to require a peer review committee or officer to report to it any disciplinary action or recommendation of such committee or officer; to transfer to it records of such committee's or officer's proceedings or actions to restrict or revoke the license, registration, certification or other authorization to practice of a healthcare provider; or to terminate the liability of the fund for all claims against a specific healthcare provider for damages for death or personal injury pursuant to K.S.A. [40-3403](#)(i), and amendments thereto. Reports and records so furnished shall not be subject to discovery, subpoena or other means of legal compulsion for their release to any person or entity and shall not be admissible in evidence in any judicial or administrative proceeding other than a disciplinary proceeding by the state board of healing arts or other healthcare provider licensing or disciplinary boards of this state.

(e) A peer review committee or officer may report to and discuss its activities, information and findings to other peer review committees or officers or to a board of directors or an administrative officer of a healthcare provider without waiver of the privilege provided by subsection (b) and the records of all such committees or officers relating to such report shall be privileged as provided by subsection (b).
